14. FAIR VALUES HIERARCHY

The Company uses the following hierarchy for determining the fair value of all financial instruments carried at fair value:

- Level 1 : Active Market – quoted price

Refers to financial instruments which are regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service or regulatory agency, and those prices which represent actual and regularly occurring market transactions on an arm's length basis. Such financial instruments include actively traded government securities, listed derivatives and cash products traded on exchange.

- Level 2 : No Active Market – Valuation techniques using observable input

Refers to inputs other than quoted price included within Level 1 that are observable for the asset or liability, either directly (i.e. prices) or indirectly (i.e. derived from prices).

Examples of level 2 financial instruments include corporate and government.

- Level 3 : No Active Market – Valuation techniques using unobservable input

Refers to financial instruments where fair values are measured using unobservable market inputs. The valuation technique is consistent with level 2.

Examples of level 3 instruments include corporate bonds in illiquid markets and structured and embedded derivatives.
